

WAVE STONE

泊浪石

WAVE STONE 泊浪石

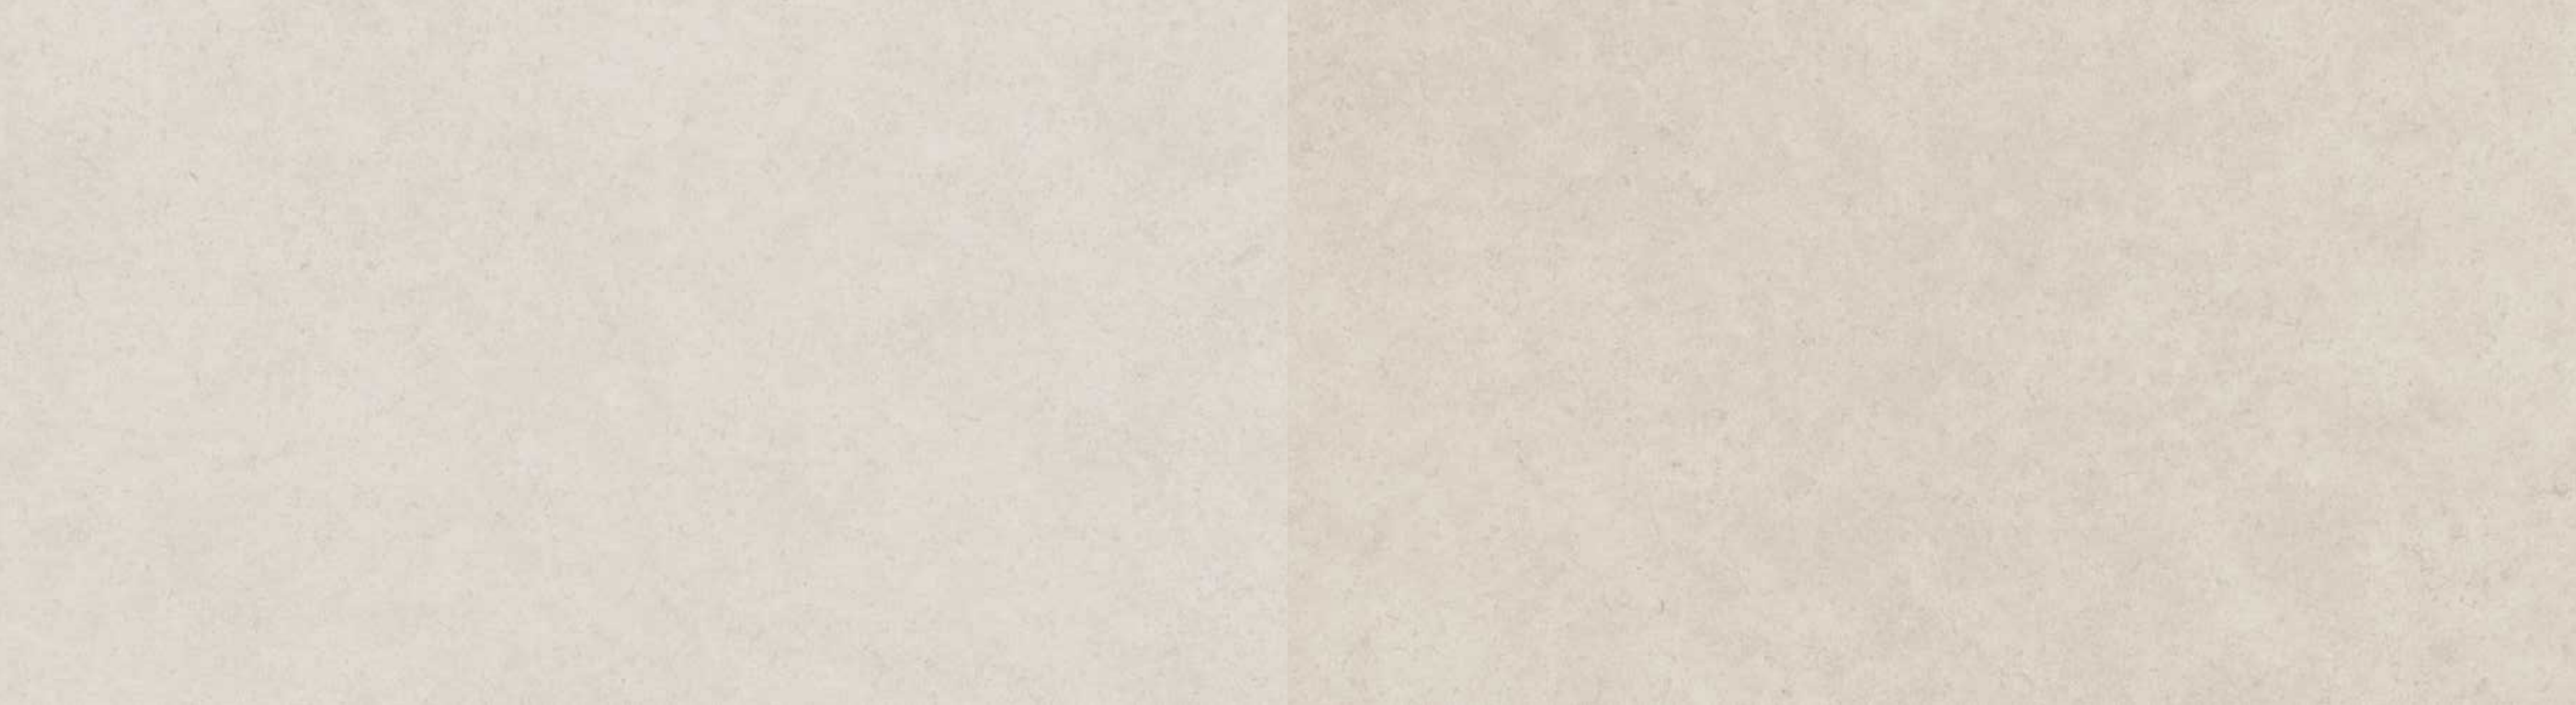

Originating from the symbiotic beauty of waves and shell fossils, with millions of years of geological sedimentation, seawater washes and fuses shells, corals, rock fragments, and other marine life, forming the stone of life that modern achievements have used to create classic architecture.

源于海浪与贝类化石的共生之美，千万年的地质沉淀，海水将贝类、珊瑚、岩屑等海洋生物冲刷融合，经现代成就经典建筑的生命之石。
